

# Improve your Cloud security the smart way with **CISO as a Service**

Whether you're new to Google Cloud or looking to scale up your deployment, CISO as a Service from Appsbroker is effective in any Google Cloud environment. Streamline the CISO role with access to all the tools and resources needed to safeguard your Cloud estate.

## Benefits

**Faster detection and response to cyber threats**

**Strengthened overall cybersecurity posture**

**Improved communication between employees and the management**

**Greater visibility into all aspects of the cybersecurity ecosystem**

## Eliminate ongoing Cybersecurity challenges

Identify, track and report on risks related to regulatory changes, detect potential violations at an early stage, and take the appropriate action at the right time. Choosing CISO as a Service shines a light on all areas of the cybersecurity ecosystem, including threats, vulnerabilities, attacks, and data breaches.

## Automate the detection of incidents

Provide support and guidance in response to any cybersecurity incidents with a dedicated Google Cloud security expert, offering advice on managing security posture, protecting assets and optimising security investments.

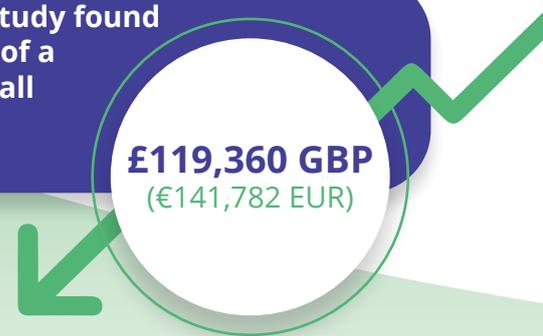

## Speed up learning and reduce risks

Save time and money with a professionally-curated knowledge base to ensure your regulations are compliant at all times. We empower teams through engaging and powerful series of resources, webinars and hands-on workshops with everything you need. And get security alerts and notifications sent straight to your smartphone or email account so you can act fast.

A Ponemon Institute study found that the appointment of a CISO reduced the overall cost of a breach by an average of

**£119,360 GBP**  
(€141,782 EUR)

## CISO as a Service: Flexible and fully adaptable

Biweekly/monthly regular cadence for 3 months with option to extend.

An open forum to discuss any ongoing security concerns.

Security Leadership provision for organisations with limited resources.

Appsbroker's Digital Native security services can be combined with CISO as a Service to make your Google Cloud security air-tight. **Here's how:**

- **DIGITAL NATIVE SECURITY INCUBATOR** - We combine our Cloud Security Posture Review product and CISO as a Service offering to address the specific security needs of Digital Natives by reducing their threat surface
- **SECURITY LEADERSHIP RESOURCES** - A valuable community resource full of go-to information from security experts. Grow confidence amongst your team and fulfil the CISO role to further secure your cloud journey.
- **SECURITY MANAGED SERVICES** - Appsbroker becomes an extension of your team and your systems, providing enterprise-grade wrap-around Managed Services, powered by people, process and technology.

**"Trust nothing, verify everything"**

- Head of Practice, Mike Smith
