# Actionable Modernisation Roadmap in 2.5hrs

## Application Modernisation Workshop

Google Cloud SPECIALIZATION **Partner of the Year** Application Development 2019

Google Cloud

## Key Takeaways

**A framework to address the top 3 CEO priorities -** See how you can accelerate revenue, improve time-to-market and reduce costs without compromise.

**Four weeks to realising benefits -** Your first workload can be modernised in just four weeks, allowing you to start experiencing positive outcomes fast.

**Future-proofed compliance -** Avoid vendor lock-in - modernise your apps to live on-premise or in different clouds in a truly portable and manageable way.

Explore the performance benefits of running critical applications in the Cloud on **Google Cloud Platform** in our 2.5 hour workshop.

---

### 1 Insights into Current State

We will assess how effectively your organisation currently uses applications, covering the following areas:

Teams, technology, current internal initiatives, recent customer wins.

### 2 Application Empowerment

We will take a deep dive into the pain points that are holding your business back, and empower your team to improve:

Time from idea to value, application performance against best practices, maturity of your organisation's capabilities (e.g. hybrid cloud).

### 3 The Art of the Possible

We will align your business ambitions with tried-and-tested application modernisation methodologies from Google Cloud, and outline your road to modernising your applications.

### 4 Pilot Preparations

Agree on an approach to overcome initial blockers and modernise a workload in just four weeks through a pilot.

### 5 Actionable Roadmap

We will outline a roadmap to take you from launch through to meeting target objectives while continually delivering value. Use best practices such as Agile to keep iterating and improving.

## Let's get modernising!
