

Want to empower your security team to **respond to cyber threats in minutes?**

Let Chronicle's cloud-native security, orchestration, automation and response (SOAR) product help you out. Google's powerful yet simple playbook automation and context-rich investigation will give you the ability to respond to cyber threats in minutes - not hours or days! With Chronicle's threat-centric approach, you can easily ensure every security team member is informed, productive and effective.

Automate up to **98% of Tier 1 tasks**

Reduce analyst caseload by up to **80%**

Speed response **10x**

Why Chronicle SOAR?

Interpret and resolve threats faster

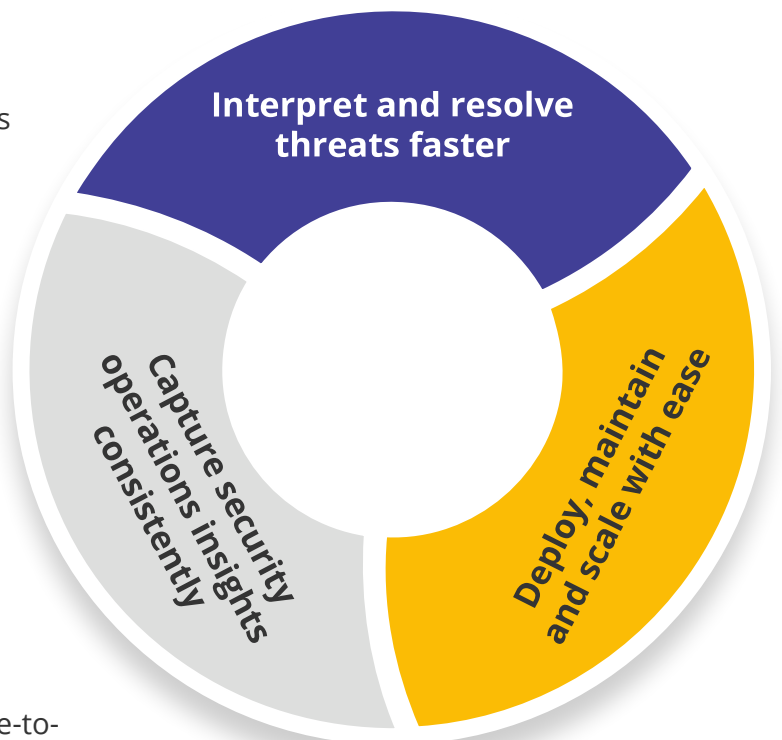

Shift the paradigm by uniting context with a threat-centric approach, empowering analysts to quickly focus on what's truly important instead of drowning in analysis and data.

Capture security operations insights consistently

Empower security teams to consolidate and easily see the scope of activities, generate insights that drive improvement, and measure progress over time - enabling you to be agile, efficient and anticipate future threats.

Deploy, maintain and scale with ease

Chronicle SOAR is designed for fast initial time-to-value and ease of scaling as you grow. Pre-packaged use cases, an intuitive playbook builder, and powerful playbook lifecycle management enable teams to hit the ground running and ensure that over time SOAR increases in value, not complexity.

What is Chronicle?

Chronicle delivers well beyond customary SOAR offerings to help your security team move past the daily cyber-grind and concentrate on what matters most: **building resiliency and remediating real threats, fast.**

Chronicle SOAR has:

300+ Integrations which the tools SecOps teams rely on for detection, investigation and response

Packaged use cases to quickly address common SecOps scenarios

Vibrant community with thousands of SecOps pros sharing content and best practices

Develop your detection strategy in Chronicle with the help of Google Cloud experts. The Google Cloud team will help plan and deploy your initial Chronicle implementation. Take advantage of the following key activities:

Strategy Session

Chronicle use and Chronicle Detect rule development training –

Train your team on how to use Chronicle in your environment and provide content development best practices

Technical setup review – Review architecture and provide advice and guidance on key decision points for how Chronicle will be set up

Project management sessions – Regular project management sessions geared towards team alignment, removing obstacles, and ensuring project progress

About Appsbroker

Appsbroker is a 'born in the cloud' Google Premier Partner and Managed Service Provider with more time spent on Google Cloud projects than any other MSP. We're experts in solving our customers' digital transformation challenges, delivering high-value platform and security services for organisations and helping to drive efficiencies in application, network and security operations.
